

G-Drink Vertical DY 6

Vertical-rail system

Reducing Service Calls

Best-in-class Glass Front Vendor: G-Drink.

The success of this machine is a very simple but an extremely reliable delivery mechanism.

This mechanism, a robot, is developed in Japan with a cutting-edge technology calculating meticulously all mechanical movements before taking the product with the catcher and delivering it in the most accurate way possible.

Should a product accidentally drop down, the new vertical lift system allows the catcher to slide over the bottle without hindering its movement.

The chosen product will thus be delivered meaning you won't be missing out on sales.

Moreover, service calls are reduced to the absolute minimum ensuring you from the highest benefit.

The new vertical lift system will contribute even more to your succes!
